

“Howard Tenens IT Capability”

WIL Presentation

Sustainable Logistics

12th May 2011

Howard Tenens

- Howard Tenens Background
- Howard Tenens Geographical Locations
- How Howard Tenens Uses Today's Technology for
 - Warehousing
 - Transport
- Tools we use
 - Interfacing
 - Hand-helds
 - Third party systems
 - Reporting
- Future Plans
 - Cloud computing
- Questions & answers

Howard Tenens Background

- Howard Tenens is a family owned logistics business
- Taken responsibility for the emissions it can directly control in the supply chain
- Proactive in delivering 'sustainable logistics' and leading the industry in environmental innovation
- Provides tailored logistics services across the entire business spectrum

- Felixstowe
- Sharpness
- Swindon
- West London

PLATFORMS

- Birstall
- Belper
- Hull
- Glasgow
- Leeds
- Manchester
- Newcastle
- Sheffield

How HT uses technology for warehousing

Warehousing

- HT has a multi-client , multi-site application developed in-house
 - Web based solution
 - Interfaces into 99.9% of all legacy based systems
 - Full warehouse management functionality dashboard
 - Full reporting suite
 - Full financial package which integrates into our internal accounts management systems
 - Resource planning an efficiency reporting (people/ MHE / warehouse)
 - Appointments setting
 - Stock control, cycle count efficiency and full traceability

How HT uses technology for Transport

Transport

- HT has a centralised planning tool across 6 locations
 - Web based solution
 - Interfaces into 99.9% of all legacy based systems
 - Full reporting suite
 - Full financial package which integrates into our internal accounts management systems
 - Resource planning and efficiency reporting (people /tractors and trailers/ MHE)
 - Appointments setting
 - Full repairs and maintenance programme for the HT fleet
 - TomTom integration (telematics, orders, step in, step out, log-in, log-out)

Tools Howard Tenens Use

Interfacing

- Fully integrated solution - Boomi
- Accepts customer raw data and converts this
- Sense checks and reporting
- Flexible solution

Hand -helds

- Full signature capture
- Runs off the GSM network so the data is live
- Capable of RFID and can go straight into the WMS and / or TMS

Tools Howard Tenens Use

Third Party Systems

- Capable of integrating third party systems into HT WMS
- Provides full visibility and traceability of both vehicle and product via the web within a 2 miles radius

Reporting

- 3 key elements
 - Full warehouse standard reports
 - Full transport reports
 - Full financial reports

Howard Tenens Future Plans

HTWMS

- Move towards cloud computing rather than client server environments
- This will allow greater flexibility across the UK and Europe for HT and our customers
- Bespoke modules can be purchased rather than the whole application
- This offers customers and potential customers value for money
